### 9. Earnings Per Share

Basic earnings per share are calculated by dividing the profit attributable to ordinary shareholders by the weighted average number of ordinary shares in issue during the period. The weighted average number of shares excludes shares held by an Employee Benefit Trust (see note 22) and has been adjusted for the issue/purchase of shares during the period.

For diluted earnings per share, the weighted average number of ordinary shares in issue is adjusted to assume conversion of all dilutive potential ordinary shares. These represent share options granted to employees where the exercise price is less than the average market price of the Company's ordinary shares during the 52 weeks to 30 March 2018.

The Group has also chosen to present an alternative earnings per share measure, underlying earnings per share, with profit adjusted for non-recurring items because it better reflects the Group's underlying performance. This measure is defined on page 151.

<b>For the period</b>	<b>52 weeks to 30 March 2018 Number of shares m</b>	52 weeks to 31 March 2017 Number of shares m
